WORK EXPERIENCE

Software Engineer Intern, Tesla Fremont, CA USA   May 2018 – Aug 2018
- Developed and improved features on the web application www.tesla.com
- Worked on tool that Technicians use to fix vehicles using JavaScript, Node.js, React, and MongoDB, as well as doing manual testing and wrote unit and UI tests
- Worked on converting Service Scheduling page, which allows users to schedule service appointments to fix their vehicles, from using AEM to a single page application using React as front end and a Node.js server for backend

Software Development Co-op, Vision Critical Vancouver, BC Canada   May 2017 – Dec 2017
- Used C# and SQL for backend/database development, and NUnit for writing unit tests, and integration tests in ASP.NET Core
- Used HTML5, JavaScript, CSS, and React for frontend work
- Contributed to the admin facing features that my team develops, fixing defects, as well as tech debts to improve the performance and business logic of processes in our product

Agile Developer Co-op, SAP Vancouver, BC Canada   Jan 2016 – Aug 2016
- Wrote code to solve problems, isolate problems, and debugged using Jasmine Tests and Chrome Developer Tools, also did QA manual testing of features on the SAP ORCA (business objects cloud)
- Contribute to the Infrastructure Scrum Team's features, testing, bug fixing, and provided KTs for coworkers
- Learned to implement JavaScript, SAPUI5, SQL, Python, and CSS on Sublime and SAP HANA Studio

PROJECTS | GitHub Repo: https://github.com/kwang101

5pectrum, *UBC NW Hackathon*   Feb 2016
- Using **Raspberry Pi** technology, we tag items such as smartphones, car keys, and other devices then utilize colour sensors , these items are then registered and tracked for usage
- I worked on front-end tasks by using Bootstrap, JavaScript, and HTML to develop the WebApp and learned a bit about **Socket.io** to connect the back-end to front-end
Technologies and Languages: Bootstrap, HTML, CSS, Raspberry-pi, JavaScript, GitHub

PrintingLikeAPro, *UBC Apps4Kids*   July 2015
- Designed the format of the splash screen, main menu format, UI and implemented tests and debugged the main menu page and the printing, Video demo & GitHub Repo at http://devpost.com/software/print-like-a-pro
- **App won 2nd place** in competition and each member received $75 bookstore gift card
Technologies and Languages: Android Studio, Java, Eclipse, GitHub
